Maths - Monday Measuring

Can you order the dinosaurs
from tallest to shortest?

To get the correct answer
you may need to keep
regrouping the dinosaurs.

To extend further you may like to guess how many blocks
tall the tallest dinosaur was. How many blocks tall is the
shortest dinosaur? What is the difference?

*You can choose to use any toys for this activity, it doesn't
necessarily need to be dinosaurs. © Adapt it!*

Diary Entry

For today's task, I would like you to write a few sentences about your learning at home so far. You may like to also draw a picture to go alongside your writing. ☺

What activities have you been doing? Which activity have you enjoyed the most and why? Which activities would you like to repeat?

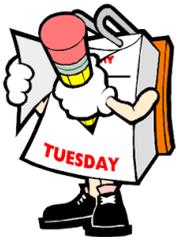

Ps. Please encourage your child to segment each word carefully and write the sounds that they hear. Also, it is good practice for the children to read their work back to check it makes sense as they go.

Why not make a journey stick/nature wand when you're out on a walk? Find a stick and put some elastic bands on it. While walking, collect things that you can see and tuck them into the bands - leaves, sticks, small flowers, e.g. blossom or daisies. Talk about the different colours, shapes, sizes. Do you know the names of the different trees and plants? If not, how could you find out?

MAKE A JOURNEY STICK/NATURE WAND

Maths - Shape Monsters

Shape Monsters is a fun, 2D shapes game where children need to identify and match circles, rectangles, squares and triangles.

Each Shape Monster only 'eats' shapes which match its own body shape. As you go, trying saying the names of the shapes aloud with your child. This will help to reinforce their understanding.

If you do not have the materials to make this activity, you can play it online at this link: <https://www.topmarks.co.uk/early-years/shape-monsters>

To expand this activity you may like to focus on other 2D shapes (it does not always need to be a square, triangle, rectangle and circle (however, please make sure your child is secure with naming these shapes before trying others)!

Phonics - Sight Words

Write a number of words on a piece of paper and ask your child to find them one by one.

You might like to do this as a timed activity and see how many they can find, are they able to beat their score?

PHSE - Friendship

During this difficult time, your child may be missing their friends. You may like to make some nature friends using wooden spatulas/spoons, pens and nature.

You may even like to let them all have a party!

Happy Wednesday

Maths

This is a mental math activity working on small addition facts.

Pair the post it calculations with the numbers on the sheet.

I wouldn't be looking for quick and rapid recall of these facts, but for your child to be able to use their head or their fingers to solve these problems.

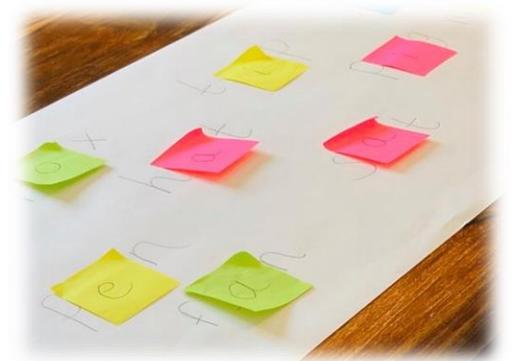

Phonics

Add the missing letter/s to read the words!
Write out several words with missing letters. Use post its to fill the gaps!

Please try to use words that include Phase 2 and 3 phonics as well as HFH (high frequency words).

You could encourage the children to write the missing letters independently, which will help with their writing skills too or they could search for the post it note with the letter written for them.

Handprint Colour Mixing

Encourage your child to explore colour mixing!
Are they able to tell you which colours they mixed to discover a new one?

Thursday 30th April 2020

Maths - Caterpillar Counting

This is a great way to practise counting and number recognition.

Draw a Caterpillar head and then write a number below it. Ask your child to draw the corresponding number of segments.

You can choose to do this by finger painting, pens, pencils, chinks (outside) etc. 😊

Anyway that works for you!

Phonics

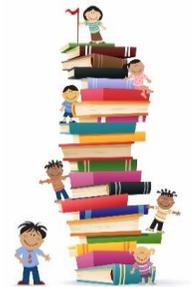

Today I would like you to practice writing your name.

This may seem like a simple task to ask your child, but if they do not practise it frequently, they may struggle to write their name when they next need to.

As a parent, I would check; is your child remembering capital letters when necessary, letter formation (short and tall letters), letters close together (almost touching) and a finger space between names.

CBeebies is full of fun and educational **games** for kids to play and learn from. If you have a computer, it would be good to use for the children to practise their mouse and keyboard skills. If not, other devices are fine. 😊 *Have fun!*

Reading

Please try to read your reading book today. 😊

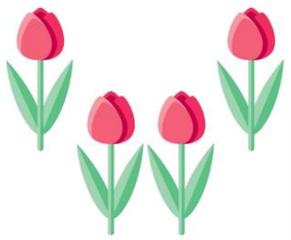

Friday 1st May 2020

Maths

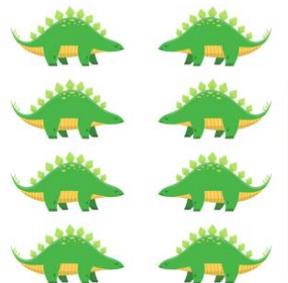

4 - 2 =

5 - 5 =

7 - 5 =

8 - 3 =

Phonics

This game involves the children jumping on the sounds as an adult says them, then swapping.

Again, I would always base these activities on Phase 3 phonics (digraphs/trigraphs) more than Phase 2.

This game can help to revisit and revise previously taught phonemes/graphemes, however, I would encourage you to extend this activity by saying a word and asking your child to segment it. They can jump to each sound as they segment. Be mindful to make sure they are making the correct link between the letter and sound.

Healthy Eating:

Cut out images of different foods from magazines and stick them together to make a healthy eating collage.

Reading - Please try to read your reading book today. 😊
